Attorney's Docket No.: 10559-519001 / P12423

Applicant: Chaitanya S. Rajguru

Serial No.: 09/993,336

Filed: November 13, 2001

Page : 2 of 8

## In the claims:

Applicants include the claims for reference only- they have not been amended:

1. (Original) An apparatus comprising:

a charge pump having a capacity that is preset to a particular value; and

a measuring circuit to measure an actual capacity of the charge pump and to reset the capacity of the charge pump to a value based on the measured capacity.

- 2. (Original) The apparatus of claim 1 wherein an output of the charge pump is preset to operate at particular voltage and current levels.
- 3. (Original) The apparatus of claim 1 wherein the measuring circuit includes a temperature sensor.
- 4. (Original) The apparatus of claim 1 wherein the measuring circuit includes a voltage sensor to sense a voltage at an input of the charge pump.
- 5. (Original) The apparatus of claim 1 wherein the measuring circuit includes a voltage sensor to sense a voltage at an output of the charge pump.
- 6. (Original) The apparatus of claim 1 wherein the measuring circuit includes a current sensor to sense a current at an output of the charge pump.
  - 7. (Original) An apparatus comprising:

an array of memory cells; and

a charge pump circuit coupled to the array of memory cells to drive the array of memory cells, the charge pump circuit comprising:

a charge pump having a capacity that is preset to a particular value, and

a measuring circuit to measure an actual capacity of the charge pump and to reset the capacity of the charge pump to a value based on the measured capacity.

8. (Original) The apparatus of claim 7 wherein an output of the charge pump is preset to operate at particular voltage and current levels.

- 9. (Original) The apparatus of claim 7 wherein the measuring circuit includes a temperature sensor.
- 10. (Original) The apparatus of claim 7 wherein the measuring circuit includes a voltage sensor to sense a voltage at an input of the charge pump.
- 11. (Original) The apparatus of claim 7 wherein the measuring circuit includes a voltage sensor to sense the voltage at an output of the charge pump.
- 12. (Original) The apparatus of claim 7 wherein the measuring circuit includes a current sensor to sense a current at an output of the charge pump.
  - 13. (Original) A computer system comprising:
  - a central processor; and
  - a memory coupled to the central processor, the memory comprising:

an array of memory cells, and

a charge pump circuit coupled to the array of memory cells to drive the array of memory cells, the charge pump circuit comprising:

a charge pump having a capacity that is preset to a particular value, and

a measuring circuit to measure an actual capacity of the charge pump and to reset the capacity of the charge pump to a value based on the measured capacity. Applicant: Chaitanya S. Rajguru Attorney's Docket No.: 10559-519001 / P12423

14. (Original) The computer system of claim 13 wherein an output of the charge pump is preset to operate at particular voltage and current levels.

- 15. (Original) The computer system of claim 13 wherein the measuring circuit includes a temperature sensor.
- 16. (Original) The computer system of claim 13 wherein the measuring circuit includes a voltage sensor to sense a voltage at an input of the charge pump.
- 17. (Original) The computer system of claim 13 wherein the measuring circuit includes a voltage sensor to sense a voltage at an output of the charge pump.
- 18. (Original) The computer system of claim 13 wherein the measuring circuit includes a current sensor to sense the current at an input of the charge pump.
  - 19. (Original) A method comprising:

measuring a capacity of a charge pump; and

resetting the capacity of the charge pump to a value based on the measured capacity.

- 20. (Original) The method of claim 19 further comprising presetting a capacity of the charge pump to a particular value.
- 21. (Original) The method of claim 20 wherein presetting a capacity of the charge pump to a particular value includes presetting the charge pump to particular voltage and current levels.
- 22. (Original) The method of claim 19 wherein measuring the capacity of the charge pump includes measuring a temperature of the charge pump.
- 23. (Original) The method of claim 19 wherein measuring the capacity of the charge pump includes measuring a voltage at an input of the charge pump.
- 24. (Original) The method of claim 19 wherein measuring the capacity of the charge pump includes measuring a voltage at an output of the charge pump.

25. (Original) The method of claim 19 wherein measuring the capacity of the charge

pump includes measuring a current at an output of the charge pump.
